

Case Study

The Software Supporting the Whole School

From getting set-up to involving parents, discover how Satchel One supports Corby Technical

L. Arnold
Vice Principal
Corby Technical College

Corby Technical School has been rated Outstanding by Ofsted and is a small school. We offer a curriculum that has a strong technical bias to suit those young people who have already shown a strong aptitude for technical subjects like engineering, electronics and computer programming. Students study a fully differentiated curriculum and progress in a climate of mutual support and respect. Students and staff alike have the common purpose of success and achievement. The aim is to develop confident learners, who take ownership of their learning and are proud of their achievements.

How did you use Satchel One during the national lockdown to continue teaching and learning?

While we did most of our communication with pupils via Microsoft Teams we found that posting on Satchel One was key in keeping parents informed.

What is the greatest benefit your school has seen since using Satchel One?

Greater parental involvement in supporting their child's learning and progress.

Why would you recommend Satchel to another school?

Yes! We have experienced benefits across the whole-school - Satchel One encourages students to be organised and proactive about their learning and helps parents to engage and support their child's education.

Any additional comments?

We've been very impressed with the support we have had from Satchel especially at the beginning of our licence - we had lots of support, encouragement and advice on how to get the best out of the system.

How satisfied are you with your Satchel One experience so far?

Very satisfied!
